**Cc:** Focarino, Margaret (Peggy); LeGuyader, John; Le, Nancy (Off of the Comm for Patents)  
**Subject:** Thanks !!!

Thank you again for meeting with us yesterday. Peggy and I really appreciate your time, your obvious dedication, and your candor.

We heard a lot of very interesting ideas, suggestions and concerns. As we said, we will not be able to address all of the issues but I believe we need to continue personally talking with all our employees so we will always know the issues that are important to you.

Here are some items we've acted on because of your input:

We've contacted STIC about your access to journal articles online. STIC believes we have the same or better access compared to NIH, but they are going to investigate. They will also be conducting focus sessions with TC 1600 examiners to see if we need to provide better training on accessing journal articles online. Or just get better access!

With respect to Search Recordation, if the search performed in an application did not include a class/subclass search then no class/subclass information is to be written in the search notes, per the Joe Rolla memo of June 2005 on Search Recordation. But please remember that you must record the key word information used in your search and other information as required in the memo. A new edition of the MPEP to be released soon and will include this information.

I want to reemphasize that you should always know exactly what your quality, timeliness, and production standards are as well as exactly what it takes to receive your next promotion. Your SPEs are more than willing to tell you exactly what is expected of you! Just ask. If there is any doubts or concerns, you can always ask me !!!

Have a Great WeekEnd !!!
